ABSTRACT

This report presents summary statistics on application and registration data for Fall 1992 in Ontario (Canada) universities. Tables and figures, which comprise the entire document, show the following information: (1) applications and registration summary and ratios; (2) applications and registrations by university and category and by gender; (3) active applications by choice preference and university as a percentage of total active and total registered applicants in each category; (4) active applications and registered applicants by programs grouping; (5) active applications by choice preference as a percentage of total active applications for each program grouping; (6) summary of regular applications, applicants and registered applicants by education source of applicants; (7) distribution of secondary school and regular applications by geographic origin as a percentage of total applications for each university; (8) geographic groupings in Southern Ontario; (9) distribution of secondary school and regular applicants by geographic origin as a percentage of total registered applicants for each university; (10) distribution of secondary school applicants and registered applicants by age and sex; (11) distribution of regular active applicants and registered applicants by age and sex; (12) distribution of secondary school active applicants and registered applicants by country and citizenship and immigration status; (13) distribution of regular applicants and registered applicants by country of citizenship and immigration status; (14) applicants and registered applicants by program and gender; (15) reconciliation of statistics on applicants in first-year post-secondary school programs, registered applicants and first year registrants. Appendixes list program groupings and geographic groupings. (JB)

This report presents summary statistics on application and registration patterns of applicants wishing to pursue full-time study in first-year places in Ontario universities. This series of annual reports commenced with admissions in the fall of 1973.

To facilitate timely release of these statistics, no commentary has been included in the report.

Introduction

This report presents application and registration data for the fall of 1992. The presentation of the data is identical to that used in last year's report. Users are cautioned to read the limitations section of this report to be aware of any factors which might affect the comparability of data in this report, both to earlier reports in this series and to other reports which present registration statistics.

Definitions

For the purpose of this report, the definitions used by the Ontario Universities' Application Centre have been employed.

Secondary school applicants refer to those applicants who were registered during the 1991-92 academic year as full-time day students in the OAC year at an Ontario secondary school. All other applicants were defined to be *Regular* applicants.

Each applicant was allowed to indicate up to three choices of universities and programmes. Each choice was considered to be a distinct *application*, even though the applicant submitted only one application form. Applicants also indicated their order of preference for their choices.

Throughout the admission cycle, applicants were permitted to amend their choices by dropping a choice and adding a different choice. Deleted choices are referred to as inactive choices or applications while current choices (up to the maximum of three) are called active choices. All of the tables in this report exclude inactive choices.

The Application Centre was responsible for processing all applications for first-year full-time applicants who were not previously registered at an Ontario university. When these applicants subsequently registered at an university, they were designated as *registered applicants*. If a student had been previously registered (i.e. repeater or internal transfer between programmes) at that institution, his application was not processed by the Centre. Data on all students registered in first-year programmes on a full-time basis were provided to the Centre by the universities via the Statistics Canada/MCU USIS/UAR system. Included in these figures were those students who had applied for

advanced standing above first year but had subsequently registered in first year. Where universities did not identify the classification of some of their registrants, these registrants were recorded as unidentified registrants.

Statistics presented in this report deal only with applicants processed by the Application Centre who are applying for fall entry into full-time study in first year of post-OAC programmes. In addition to the exclusions listed in the previous paragraph, applicants seeking admission to preliminary year programmes or diploma programmes which do not require OAC's for entry have been excluded. Table 15 presents a reconciliation of the various categories of registrants in first year.

General Limitations

As previously stated, the Application Centre received data on registrations indirectly from the universities as part of their annual submission of USIS/UAR enrolment data to Statistics Canada and MCU. In its operations the Application Centre employs a unique set of programme categories; there may not be a direct correspondence between these categories and the programme categories used by MCU and Statistics Canada. Furthermore, there may be instances where a student is reported in one programme to the Application Centre and reported in a different programme to either MCU or Statistics Canada. In addition, statistics showing enrolment in *First Year* from MCU and Statistics Canada may include programmes (e.g., law, medicine, etc.) which are not included in first year as defined by the Application Centre.

Commencing in 1989, Ryerson Polytechnical Institute began processing its applications through the Application Centre; this meant that Ryerson was now included as one of an applicant's three choices. (Prior to this, an applicant could submit three applications to Ontario universities plus an additional application to Ryerson.) As a result, statistics beginning in 1989 are no longer comparable to figures from earlier years and it has been impossible to devise any adjustment factor that would permit valid comparisons. *Readers of this report will have to exercise caution in comparing data since 1989 to data from earlier years.*
